

A1) User provides a list of **taxon names**, as a character string or as a tree.

 a, B_1, C, D, Ee, F_x

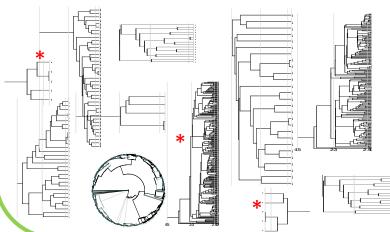

ABCDEF

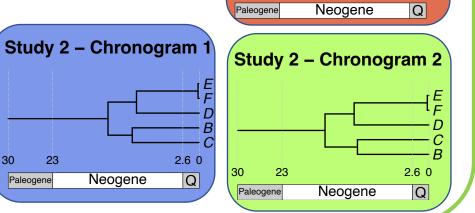

A2) Process taxon names with **TNRS** and **standardize** to a taxonomy.

B) Searching DateLife's chronogram database

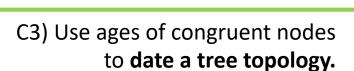

B1) Search **processed taxon names** in chronogram database and identify (*).

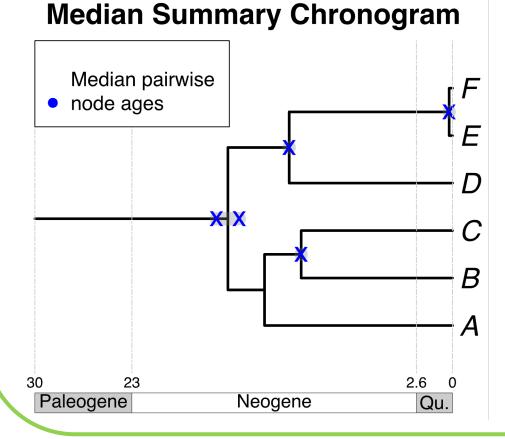

B2) Prune matching chronograms and save as **source chronograms**.

Study 1

C2) **Congruify** source chronogram nodes to nodes of tree topology.

	Node Name	taxonA	taxonB	Median Pairwise Age
1	n1	Α	D	15.5959128
2	n1	Α	Е	13.8809227
3	n1	Α	F	13.8809227
4	n1	В	D	15.8025730
5	n1	В	Е	16.6600685
6	n1	В	F	16.6600685
7	n1	С	D	15.8025727
8	n1	С	Е	16.6600683
9	n1	С	F	16.6600683
10	n3	С	В	11.6465263
11	n4	Е	D	11.2403361
12	n4	F	D	11.2403361
13	n5	Е	F	0.8081026

C) Summarizing DateLife's search results
